This is our hospital
Yesterday. Today. Tomorrow.
For decades, the physicians and staff of Lexington Medical Center have performed surgeries that have saved lives and restored health.

In the 40 years since the current operating rooms were designed, many advances have been made in surgical space and technology, and the demand for these services has increased significantly in the last decade.

Throughout those 40 years, community pride and support has remained constant. It helped open the hospital on its present site in 1979, and it helped again with the new outpatient facility in 2002. Lexington Medical Center has a long history of responding to the needs of our community, and our community has responded to Lexington Medical Center in time of need.

Today, we ask the community to:

► Reflect on that sense of pride and philanthropic support in its community hospital

► Join us as we respond to the medical needs of our citizens, and

► Undertake a major project in partnership with Wake Forest Baptist Health to build a state-of-the-art surgical facility

Now known as Wake Forest Baptist Health Lexington Medical Center, we will partner with the community to invest in a new setting for saving lives and restoring health for decades to come.

This is our hospital

*Yesterday. Today. Tomorrow.*
Our new surgical facility will allow greater numbers of patients to receive the care they need close to home.
Lexington Medical Center has launched a campaign to raise funds for this new surgical facility.

The 26,500-square foot facility will house:
► Four new operating rooms (ORs), each more than 700 square feet
► A new 1,200-square-foot family waiting area
► Two private family consult rooms
► Nine post-operative recovery bays and
► A post-operative isolation room

The new facility will feature a digital integration system where the required procedural equipment, monitors and computer systems will be located overhead. This will:
► Allow the surgical staff easier access and better mobility during surgeries
► Provide much better precision and accuracy inside the operating room
► Reduce surgical time, allowing Lexington Medical Center to accommodate more patients
► Allow Lexington Medical Center to incorporate medical advancements sooner and ensure our community has access to the latest procedures
► Help us retain our outstanding physicians and expand our base of medical providers who want access to the most modern equipment

For patient convenience, our new surgical facility will be connected to the main hospital and will serve all of our surgical procedures—from cases that may require a hospital stay to minimally invasive, outpatient procedures.

At Lexington Medical Center, our mission is to provide the very best care for our patients. This new surgical facility will help us evolve to meet these critical needs of our community by offering the most modern surgical services close to home, sparing our patients and their families from having to drive long distances for their care.
Historic Advancements

Lexington Medical Center has made historic strides over the past decade. The partnership launched in 2008 with Wake Forest Baptist Health placed us in a better position to give our patients the highest quality care with the personal compassion for which we are known.

We have added or expanded staff, technology, a rehabilitation services complex, an emergency department and a joint replacement unit to better serve patients.

Among the services we have expanded are comprehensive cancer care, wound care, pain management, cardiac and pulmonary rehabilitation. Our surgical services also have grown significantly, adding advancements and treating more patients, and now is the time to improve our surgical space.

Growth in Surgical Services

Lexington Medical Center has made historic strides over the past decade. The partnership launched in 2008 with Wake Forest Baptist Health placed us in a better position to give our patients the highest quality care with the personal compassion for which we are known.

We have added or expanded staff, technology, a rehabilitation services complex, an emergency department and a joint replacement unit to better serve patients.

Among the services we have expanded are comprehensive cancer care, wound care, pain management, cardiac and pulmonary rehabilitation. Our surgical services also have grown significantly, adding advancements and treating more patients, and now is the time to improve our surgical space.
2017 produced some of the busiest months for surgeries in Lexington Medical Center’s history.

Our four new ORs will feature a digital integration system—the latest technology will be overhead, allowing the surgical staff easier access and better mobility during surgeries.
Staying Ahead of the Pace

Some of the most common surgeries at Lexington Medical Center:

<table>
<thead>
<tr>
<th>Orthopaedics</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Surgery</td>
</tr>
<tr>
<td>Urology</td>
</tr>
<tr>
<td>Gynecology</td>
</tr>
<tr>
<td>Ophthalmology</td>
</tr>
<tr>
<td>ENT/Otolaryngology</td>
</tr>
</tbody>
</table>

In addition to general surgeries, such as gall bladder procedures, breast lumpectomies and appendectomies, we now regularly perform more complex surgeries.

Many of these are minimally invasive, such as arthroscopy and laparoscopy. These require fewer, smaller incisions than open surgeries and rely on special instruments and advanced technology—including tiny video cameras, digitally enhanced displays of the surgical area and computer guidance technology—to ensure the most precise work.

All of these advancements have been realized during the past 40 years and made possible by past investments from the community and Lexington Medical Center leadership. Our patients today experience faster recoveries, reduced scarring and less discomfort following surgeries.

But we need to do more, and our current surgical space, while extremely safe, limits our options for adding and upgrading technology.
Fulfilling the Goal

Campaign Naming Opportunities:

**Lexington Medical Center Surgical Facility:** $1.5 million
**Family Waiting Area:** $500,000
**Family Consultation Rooms (2):** $25,000 each
**Operating Rooms (4):** $100,000 each
**Post-Anesthesia Care Unit (PACU):** $100,000
**Operating Room Staff Lounge:** $100,000
**Lockers (92):** $1,000 each
**Cystoscopy Room:** $50,000
**Endoscopy Rooms (2):** $25,000 each
**Donor Recognition Display:** Gifts of $10,000+

We are empowering a community-driven campaign with help from Wake Forest Baptist Health and creating a partnered investment in health care that will resonate throughout our region for decades.

Our new surgical facility can be in place to serve our patients in time for the 40th anniversary of Lexington Medical Center's current campus in late 2019—an 18-month plan to deliver a modern, technologically advanced and comfortable surgical facility.

To reach our goal, we will rely on private philanthropic contributions and an element that has sustained us for generations: community pride and support.

Our community deserves the best and most modern setting for receiving the best care.

Join us in fulfilling this challenge.
